Boiler maintenance schedule

FleetOptima
fleetoptima.org

For small commercial hot water and steam boilers. Steam boilers need a lot more attention than hot water ones, and this is the sheet where state law matters most.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Daily

TASK	HOW OFTEN	NOTES	✓
Look it over: running right, safety devices in place	Daily		
Burner condition	Daily		
Water level steady, pressure where it should be	Daily	Steam boilers	
Blow down the water column and gauge glass	Regularly; daily is common	Steam boilers; some states set the frequency	

Weekly

TASK	HOW OFTEN	NOTES	✓
Test the low-water cutoff	At least weekly	Some states require it more often; see note	

Quarterly

TASK	HOW OFTEN	NOTES	✓
Test safety / relief valves	At least quarterly	Low-pressure boilers	

Yearly

TASK	HOW OFTEN	NOTES	✓
Inspection by your state's boiler inspector	Yearly in many states	See note	
Clean and tune the burner, combustion analysis	Yearly	Technician	
Check the water treatment system	Yearly (often monthly)		

Required by code? Many states require periodic boiler inspections by a state or insurance inspector, and some set how often you test the low-water cutoff (one state requires it daily). Which boilers are covered varies, and some small hot-water heating boilers are exempt. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.

Service log: boiler

Machine / unit: _____ Make & model: _____
