Compact tractor maintenance schedule

FleetOptima
fleetoptima.org

For compact utility tractors in the 25 to 60 hp range. One fluid usually runs the transmission and the hydraulics both, so its filter matters more than people think.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Break-in (new tractors)

TASK	HOW OFTEN	NOTES	✓
First engine oil and filter	About 50 hours		
First transmission / hydraulic filter	About 50 hours	Varies by model	
Check wheel bolt torque	After the first 10 hours		

Every day or 10 hours

TASK	HOW OFTEN	NOTES	✓
Test seat and PTO safety switches	Daily		
Check engine oil, transmission oil and coolant	Daily		
Drain the fuel water separator	Daily		
Clean the grille and radiator screens	Daily		
Check the air filter	Daily		
Tires and wheel bolts	Daily		
Clear grass and debris, look for leaks underneath	Daily		

By hours

TASK	HOW OFTEN	NOTES	✓
Grease fittings and 3-point hitch	Every 50 hours	Every 10 hours in wet conditions	
Check front axle oil	Every 50 hours		
Fan and alternator belt	Every 100 to 200 hours		
Engine oil and filter	Every 200 to 400 hours or yearly	Makers and even manuals disagree; use yours
