Mini excavator maintenance schedule

FleetOptima
fleetoptima.org

For compact (mini) excavators. Grease and track tension are the daily habits. Work in water or mud and the swing bearing wants grease far more often.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

First 50 hours (new machines)

TASK	HOW OFTEN	NOTES	✓
Engine oil and filter, fuel filter	At 50 hours		
Travel motor oil	At 50 hours		
Hydraulic filters and reservoir breather	At 50 hours		
Check belts and electrical connections	At 50 hours		

Every 10 hours (daily)

TASK	HOW OFTEN	NOTES	✓
Check engine oil, coolant and hydraulic fluid	10 hours		
Check the air filter indicator	10 hours		
Drain water from the fuel filter	10 hours		
Grease all pivot points	10 hours		
Check and adjust track tension	10 hours		
Seat belt, console lockout, travel alarm, lights	10 hours		
Check the coupler	10 hours		

By hours
