Skid steer maintenance schedule

FleetOptima
fleetoptima.org

For skid steer loaders. The 10-hour list is the daily one: grease every pivot, check the fluids, and make sure the seat bar locks out the controls.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

First 50 hours (new machines)

TASK	HOW OFTEN	NOTES	✓
Engine oil and filter	At 50 hours		
Hydraulic / hydrostatic filter	At 50 hours		
Check the drive belt	At 50 hours		
Check wheel nuts	Every 10 hours until 50		

Every 10 hours (daily)

TASK	HOW OFTEN	NOTES	✓
Check engine oil and coolant	10 hours	Coolant with the engine cold	
Check the air filter indicator	10 hours	Service the filter when it says to	
Clean the radiator	10 hours		
Drain water from the fuel filter	10 hours		
Grease lift arms, cylinders, attachment plate and pivots	10 hours		
Seat belt, seat bar and interlocks	10 hours	With the bar up, lift and tilt shouldn't work	
Tires, lights, horn, decals	10 hours		

By hours

TASK	HOW OFTEN	NOTES	✓
Hydraulic fluid level, hoses, chaincase level, park brake, wheel nuts	Every 50 hours		
Spark arrester, battery cables	Every 100 hours		
Engine oil and filter	Every 150 to 500 hours or yearly	Small machines are on the short end; every 100 hours in dusty, hot or cold work	
Fuel filter, drive belts	Every 250 hours or yearly		
Hydraulic filter and reservoir breather	Every 500 hours or yearly		
Hydraulic fluid and chaincase fluid	Every 1,000 hours or yearly		
Coolant	Every 2 years
