Stump grinder maintenance schedule

FleetOptima
fleetoptima.org

For walk-behind and self-propelled stump grinders. Rocks and dirt in the stump chew up teeth and pockets, so the daily wheel check matters more than anything else on this sheet.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first. Grease points and intervals vary by model, so follow your manual for those.

Every day or 10 hours

TASK	HOW OFTEN	NOTES	✓
Walk around it	Daily		
Check engine oil and fuel	Daily		
Check hydraulic oil level	Daily	Hydraulic models	
Check the air cleaner	Daily		
Inspect the cutter wheel and teeth	Daily	Turn it by hand. Flip or replace teeth once they're duller than your fingertip; outer teeth wear fastest	
Clean off grease and oil buildup	Daily		

By hours

TASK	HOW OFTEN	NOTES	✓
Pre-cleaner element	Every 25 hours		
Belt tension, engine air filter	Every 50 hours		
Battery, cooling shrouds, oil cooler fins, clutch	Every 100 hours		
Spark plug, oil filter	Every 200 hours		
Tires	Every 300 hours		
Starter and drive system	Every 500 hours or yearly
