Utility and equipment trailer maintenance schedule

FleetOptima
fleetoptima.org

For utility and equipment trailers with electric brakes. Equipment trailers live near their weight limit and do lots of short heavy hauls, which is exactly what wears out bearings and brakes.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Every trip

TASK	HOW OFTEN	NOTES	✓
Test the brakes	Every use		
Check the breakaway battery and switch	Every use		
Check tire pressure	Before each trip		
Re-torque lug nuts after a wheel is mounted	After the first few dozen miles	Common practice is about 10, 25 and 50 miles	

Weekly

TASK	HOW OFTEN	NOTES	✓
Check tires for cuts, wear and bulges	Weekly		

Every 3 months or 3,000 miles

TASK	HOW OFTEN	NOTES	✓
Adjust brakes	3 months / 3,000 miles	Not needed on self-adjusting brakes	
Grease suspension bolts and equalizers	3 months / 3,000 miles		
Torque lug nuts	3 months / 3,000 miles		

Every 6 months or 6,000 miles

TASK	HOW OFTEN	NOTES	✓
Check brake magnets	6 months / 6,000 miles		
Check the brake controller	6 months / 6,000 miles		
Check suspension parts and wheels	6 months / 6,000 miles	Cracks, wear, looseness	

Yearly or 12,000 miles

TASK	HOW OFTEN	NOTES	✓
Clean and repack wheel bearings	12 months / 12,000 miles	Easy-lube hubs still need this yearly	
Replace seals if removed, check for leaks	12 months / 12,000 miles		
Inspect brake linings, drums and wiring	12 months / 12,000 miles		
Inspect springs and hanger welds	12 months / 12,000 miles
