Vehicle lift maintenance schedule

FleetOptima
fleetoptima.org

For two-post and four-post automotive lifts. The daily check takes a minute and is the one that keeps a truck off somebody's head.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Every shift

TASK	HOW OFTEN	NOTES	✓
Raise and lower it empty	Start of each shift	Make sure it runs level and smooth	
Hydraulic lines and fittings	Daily	Leaks, cracks, pinch points	
Cables	Daily	Fraying, kinks, rust. A damaged cable means the lift is out until replaced, as a full set	
Arm locks and restraints	Daily	Clean grease off the lift pads	
Wiring	Daily	Look for damage	

Every 1 to 2 months

TASK	HOW OFTEN	NOTES	✓
Grease column slide channels and arm pins	Every 1 to 2 months		
Lubricate safety locks, check the release cable	Every 1 to 2 months		
Check anchor bolts, re-torque if needed	Every 1 to 2 months		

Every 4 months

TASK	HOW OFTEN	NOTES	✓
Lubricate cable pulleys (sheaves)	Every 4 months		
Check equalizer cable adjustment	Every 4 months		

Yearly and beyond

TASK	HOW OFTEN	NOTES	✓
Inspection by a qualified lift inspector	At least yearly	ANSI/ALI standard; see note below	
Change hydraulic fluid	Every 2 years	Use the hydraulic oil your manual specifies, not transmission fluid	

Required by code? The yearly inspection by a qualified lift inspector comes from the ANSI/ALI ALOIM standard. It's a voluntary standard, not a federal law by itself, but OSHA can cite recognized standards like it, and insurers often ask for it. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.
