Walk-behind mower maintenance schedule

FleetOptima
fleetoptima.org

For commercial walk-behind mowers with hydro drive. Most of the work happens every 25 hours, which on a busy crew is about once a week.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Break-in (new mowers)

TASK	HOW OFTEN	NOTES	✓
First engine oil change	5 to 8 hours	Depends on the engine	
First hydraulic filter change	100 hours		

Every day
