Walk-in cooler and freezer maintenance schedule

FleetOptima
fleetoptima.org

For walk-in coolers and freezers. Most failures start small: a torn door gasket, a dirty condenser coil, or a clogged drain line in the freezer.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Daily

TASK	HOW OFTEN	NOTES	✓
Check and log the box temperature	Daily	Food service: your health department may require the log	
Keep floors clean and dry	Daily	Never hose down the inside of the box	

Weekly to monthly

TASK	HOW OFTEN	NOTES	✓
Door gaskets: tears and seal	Weekly to monthly	Close the door on a dollar bill; it should hold	
Door closes and latches on its own	Monthly	Freezers: check the door frame heater	
Anti-slip floor strips	Monthly		

Quarterly (condensing unit)

TASK	HOW OFTEN	NOTES	✓
Clear dirt and debris from the condenser coil	Quarterly	Monthly if it's near a kitchen or on a dusty roof	
Look for oil stains and leaks	Quarterly		
Check the sight glass	Quarterly	Bubbles or moisture mean call a tech	
Listen for noise and vibration, check wiring	Quarterly		

Twice a year

TASK	HOW OFTEN	NOTES	✓
Clean the evaporator coil inside the box	Every 6 months		
Clear the drain pan, drain line and trap	Every 6 months	Sooner if it clogs	
Check fans and defrost controls	Every 6 months	Freezers: check the drain line heater too	
Full condensing unit service	Every 6 months	Technician: pressures, controls, safeties	

Service log: walk-in cooler and freezer
