Zero-turn mower maintenance schedule

FleetOptima
fleetoptima.org

For commercial zero-turn mowers. Everything runs on engine hours, so the hour meter is your calendar. The first oil change on a new mower comes fast.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Break-in (new mowers)

TASK	HOW OFTEN	NOTES	✓
First engine oil change	5 to 8 hours	Depends on the engine	
First hydraulic filter and fluid change	100 to 250 hours	Varies by model; check your manual	
Check wheel nuts and parking brake	First 100 hours		

Every day

TASK	HOW OFTEN	NOTES	✓
Check engine oil	Daily		
Check blades	Daily	Sharp, straight, bolts tight	
Test safety switches	Daily	Seat, brake, blade engagement	
Check roll bar and seat belt	Daily		
Look for loose hardware	Daily		
Clean grass off the engine, exhaust, hydro fans and deck	Daily	Packed grass is the main cause of overheating	

By hours

TASK	HOW OFTEN	NOTES	✓
Grease front caster axles	Every 25 to 50 hours		
Service the air filter pre-cleaner	Every 25 hours	More often in dust	
Check tire pressure	Every 25 to 50 hours		
Check belts	Every 25 to 50 hours		
Grease deck and idler pivots	Every 50 to 100 hours		
Engine oil change	Every 100 hours or yearly	Some engines allow longer only with the maker's own synthetic oil and filter	
Clean engine cooling fins	Every 100 hours	Remove the shrouds	
Oil filter	Every 100 to 200 hours		
Fuel filter	Every 200 hours		
Air filter element	Every 100 to 250 hours	Sooner in dust	
Spark plugs	Check at 100 to 200 hours, replace around 500		
Hydraulic filter and fluid	Every 500 hours	Shorter with some oils; check your manual
