Commercial mixer maintenance schedule

FleetOptima
fleetoptima.org

For planetary and spiral mixers in bakeries and kitchens. The bowl guard interlock is what keeps hands out of a running mixer, so check it every day, not just at the yearly service.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Daily

TASK	HOW OFTEN	NOTES	✓
Clean the mixer, bowl and attachments	Daily	Damp cloth; never hose it down	
Bowl guard and interlocks: won't run with the guard open	Daily	Pull it from service if it does	
Bowl, agitator and guard fitted right	Each use		
Wipe the drip cup and splash guard	As needed	They come off for cleaning	

Monthly

TASK	HOW OFTEN	NOTES	✓
Spiral mixers: safety devices and bowl guide rollers	Monthly	Service technician	

Twice a year

TASK	HOW OFTEN	NOTES	✓
Service visit	At least twice a year	More or less often depending on use	
Planetary: grease the slideways and bowl supports	About twice a year	Thin coat of the grease your manual names	
Planetary: light oil on the agitator shaft	Twice a year		
Spiral: adjust spiral and bowl drive belt tension	Every 6 months	Service technician	
Spiral: check electrical gear, tool tight	Every 6 months		

Yearly and as needed

TASK	HOW OFTEN	NOTES	✓
Interlock switches: guard and bowl support	At least yearly	Inspected by a trained service tech	
Transmission belt wear	Yearly		
Gearbox (transmission) oil level	Per your manual	Don't overfill; it can leak	
Planetary seal squeaks	As needed	Work a little mineral oil under the seal lip	

Required by code? In bakeries, OSHA 1910.263 requires a mixer's belts, gears and other moving parts to be fully enclosed, and a handy manual switch that keeps the mixer from being started while it's cleaned or serviced. Keep those covers on and that switch working. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.
