Commercial bakery oven maintenance schedule

FleetOptima
fleetoptima.org

For deck, convection and rack ovens. In a bakery, OSHA wants the oven's safety devices checked twice a month by a trained employee, so most of this sheet is built around that routine.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Daily and weekly

TASK	HOW OFTEN	NOTES	✓
Clean the outside and the door glass	Daily	Let the glass cool first; no oven cleaner or steel wool	
Deck ovens: brush or vacuum the decks	Daily	Never wash the stones with soap and water	
Clean the oven interior and windows	Weekly	Don't move the air shutter settings while cleaning	

Twice a month (owner checks)

TASK	HOW OFTEN	NOTES	✓
Test the oven's safety devices	Twice a month	Trained employee; see note	
Gas ovens: ignition lockout works	Twice a month	Shut the gas off and confirm the burner locks out	
Airflow / draft switch shuts the burner off	Twice a month		
Door gaskets: no air or steam blowing out	Twice a month	Adjust or replace leaking gaskets	
Vacuum lint and dust from the burner area and air passages	Twice a month		
Rack ovens: rotation belt and rack stop position	Twice a month		
Cavity vent opens and closes; steam works	Twice a month		
Look for discolored wiring connections	Twice a month	Call service if you find any	

Monthly

TASK	HOW OFTEN	NOTES	✓
Vacuum the steam exhaust blower and burner air intake	Monthly		
Water filter or softener on the steam line	Clean or replace regularly	Hard water scales up the steam system	

Yearly

TASK	HOW OFTEN	NOTES	✓
Service by a qualified technician	Every 6 to 12 months	Burner, gas pressure, combustion, steam generator, controls	
Safety devices inspected by the oven maker's representative	Yearly	See note	
Temperature calibration check	Per your manual		

Required by code? OSHA 1910.263 covers bakery equipment. It requires oven safety devices to be inspected at least twice a month by a specially appointed, trained bakery employee, and at least once a year by the oven maker's representatives. It also requires gas burners to shut off the fuel if the pilot or flame fails. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.
