Powder coating cure oven maintenance schedule

FleetOptima
fleetoptima.org

For batch and conveyor cure ovens, gas or electric. Powder cures on part temperature, not oven air temperature, so a heavy part can come out under-cured from an oven that reads right on the dial.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Every bake

TASK	HOW OFTEN	NOTES	✓
Time the cure from part temperature	Every bake	Start the clock when the part is up to temperature	
Watch the burner flame	Daily	It should burn blue; a yellow flame can yellow the finish	

Weekly

TASK	HOW OFTEN	NOTES	✓
Clean or replace clogged air filters	Weekly		

Monthly

TASK	HOW OFTEN	NOTES	✓
Temperature profile with your heaviest part	At least monthly	And whenever the load changes a lot	
Test every safety interlock	Monthly	Force each one to trip and confirm the oven shuts down	
Test the flame safeguard	Monthly	Shut off the gas to the burner and confirm it locks out	
Inspect and clean the flame sensor and igniter	Monthly		
Check air and gas pressures, test alarms	Monthly		
Exhaust and ventilation fans running right	Monthly		
Fan belts, fan bearing grease, door hinges and latches	Monthly		
Electric ovens: retighten heater connections	Monthly	Discolored terminals mean a loose connection	

Yearly

TASK	HOW OFTEN	NOTES	✓
Leak test the safety shutoff valves	Yearly	See note	
Run the full startup sequence, check each safety step	Yearly		
Inspect and clean burners	Yearly		
Clean the fan wheels	Yearly	Keeps airflow up	
Explosion relief vents clear and labeled	Yearly		
Check pressure switch settings	Yearly		
Door seals and gaskets	Per your manual	Make sure they still seal	

Required by code? NFPA 86 requires safety interlocks to be function-tested at least yearly, interlock set points verified at least yearly, safety shutoff valves leak-tested at least yearly, and that testing written down. It also requires training for the people who run and maintain the oven. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.
