Powder and spray booth maintenance schedule

FleetOptima
fleetoptima.org

For dry-filter paint booths and powder booths with cartridge recovery. The gauge tells you when the filters are done, so read it every day and change filters by the reading, not the calendar.

Typical intervals from manufacturer manuals and published service schedules. Your machine's manual comes first.

Daily

TASK	HOW OFTEN	NOTES	✓
Read the filter gauge (manometer)	Daily, booth running	Change filters when it passes the mark	
Look over intake and exhaust filters	Daily		
Gauge reads zero with the booth off	Daily	Liquid gauges: check the fluid, don't overfill	
Powder: cartridge and final-filter gauges, pulse timing	Daily	Powder on the final filters means a cartridge is leaking	
Powder: parts grounded through hangers	Every shift	Under 1 megohm; clean or strip hangers regularly	
Powder: clean the booth, guns and pumps	Daily and at each color change	Squeegee and vacuum	
Drain the air drop leg, check for water or oil	Daily	Hold a white cloth under it	

Weekly and monthly

TASK	HOW OFTEN	NOTES	✓
Powder: gun and cable resistance checks	Weekly	Per the gun manual	
Powder: clean feed pumps, blow out feed hoses	Weekly	Replace damaged hoses	
Scrape buildup from the exhaust plenum and ductwork	Monthly	Paint-soaked waste can catch fire on its own; store it safely	
Exhaust fan: clean the wheel, check bearings and belt	Monthly	More often in a dirty spot	

Filter changes

TASK	HOW OFTEN	NOTES	✓
Exhaust filters	When the gauge says so	Sooner if they're saturated	
Intake filters	At least every 2 months	Sooner in smog, fog or frost	
Nitrocellulose coatings	Change filters at least daily		

Required by code? OSHA 1910.107 requires spray areas to be kept as free of combustible residue as practical (cleaned daily if needed), filter media to be inspected and replaced, and conductive objects near electrostatic powder guns to be grounded. Where your fire code adopts NFPA 33, the spray application standard, it adds booth rules of its own. Code items apply where your city, state or insurer has adopted them. Requirements vary by jurisdiction, so check local code.
